

Barrel Clamps

Barrel Clamps - Referred to as "Barrel Clamp", this hydraulic accessory is used on lift trucks so as to squeeze objects which you want to move using the lift truck. Usually, they are utilized in order to barrels, handle kegs, and paper rolls, together with a few barrel clamp designs being able to rotate the load. For instance, the rotate function permits the one operating the forklift to put in a vertically stored paper into the horizontal intake of a printing press.
