

Doosan Forklift Part

Doosan Forklift Parts - Doosan Infracore Company Ltd. is an international and intercontinental corporation which consists of Defense Industry Products, Industrial Vehicles, Diesel Engines, Automation Systems, Machine Tools and Construction Equipment.

In the United States, Doosan Infracore America Corporation is headquartered in Suwanee, Georgia. It is home to a 170,000 square foot manufacturing facility, which is the home of the Compact Equipment and Construction department. West Caldwell, New Jersey is home to the Machine Tool division and Cleveland, Ohio is home to the Lift truck division. The U.S. headquarters in Georgia facilitates a first rate parts operation capable of supplying an excess of 25,000 line items to support Lift Truck, Compact Equipment, Machine Tool and Construction customer requirements.

There are well over 220 Doosan service and sales locations operating in Canada and the United States. Also, there are more than 90 independent dealers moving forklift equipment and materials handling equipment. This network allows Doosan Infracore America to aggressively compete in this competitive marketplace. The lift truck product line remarkably features 63 different models consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion vehicles. Capacities of these various truck designs vary from 3,000 to 33,000 lbs. All vehicles are manufactured in an ISO 9001 certified facility.

Doosan Infracore America is the fastest developing forklift and lift truck corporation in the North American market, thanks to its excellent level of product performance and their persistently high level of customer support and service given to all Doosan Infracore Forklift users. The U.S. lift Truck division based in Cleveland has a expert team knowledgeable in Sales, Purchasing, Advertising, Logistical and Technical Support.

Korea's initial domestic lift truck marketplace was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. began to import assembled lift trucks as part of a nationwide equipment expansion project. Initial product sales of this industrial equipment focused on large business communities, the armed services and on state-run firms. This eventually led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced trade operations throughout Korea to service and sell this heavy equipment. By 1978, a lift truck production plant was successfully completed. Continuous technical training became the new focus for improving quality and product development.

Domestic forklift trade for Daewoo started in 1967 and grew to an astonishing 90% market share in Korea. By the 1980's, Daewoo's superior technological advancements combined with sales success placed them in a situation of significant expansion of their lift truck operations.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a joint venture project to assist them in the very competitive North American materials handling market. This project proved highly lucrative for Daewoo and their lift truck product sales expanded greatly. In 1984, the company completed development of a new facility to help in manufacturing high end value-added products for export. In 1993, the company had a international sales system and started exporting designs they had established through in-house technology, as an independent product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth opportunities into overseas markets.
